**Alerting Abstract EP A**

The prepn. of 7-bromo-1,5-dihydro- 3,6-dimethylimidazo (2,1-b)quinazolin-2 (3H)-one (I) in D-form or as the racemate comprises reacting N-(6-amino-3-bromo-2-methyl benzyl) -alanine-ethyl ester (II) in D-form, or as the racemate, with bromocyan.

(II) and the following intermediates are new cpds.: N-(3-bromo-2-methyl- 6-nitro-benzyl)- alanine-ethyl ester (III) in D-form or as racemate, 3-bromo-2-methyl-6-nitro-benzyl chloride (IV), 3-bromo-2-methyl- 6-nitrobenzyl alcohol (V), 3-bromo-6-nitro-o-tolualdehyde (VI), 3-bromo-2-methyl-bentaldehyde (VII), and 3-bromo-2-methyl benzoic acid (VIII).

(I) inhibits blood platelet aggregation and can therefore be used to protect against thromboses. (II)-(VIII) are all intermediates in the prepn. of (I).
